

ADJUSTABLE THUMB

Lets Your Backhoe Curl Cylinder Do The "Clam" Action

GAT-200
Shown

The **Adjustable Thumb** is designed to increase the productivity and versatility of your backhoe or mini-excavator. Ideal for landscapers and contractors. Dig and load with the same machine. These rugged built thumbs fit most compact tractor backhoes, 3-point agricultural backhoes, skid steer backhoes, small excavators and commercial backhoes. Designed to do a wide range of material handling jobs such as: land clearing, demolition work, brush removal and pipe placement. The thumb is also handy for the loading and unloading of rocks, railroad ties, etc. A qualified welder must complete the installation.

FEATURES:

- ❑ "Claws" are made of high strength T-1 steel
- ❑ Two pin adjustable working position allows for handling a wide variety of material
- ❑ Folds flat against the dipper boom for storage
- ❑ Reinforced bracing for added strength
- ❑ Thumb is shipped pre-assembled for ease of installation
- ❑ Mounting requires welding unit to backhoe or mini-excavator dipperstick
